Magalie R. Salas
Federal Energy Regulatory Commission
888 First St. NE, Room 1A
Washington, DC 20426

Dear Ms. Salas:

I write this letter with great concern. Our waters are already being endangered and energy costs are ridiculously high. We had the chance to use nuclear power and that was sadly taken away. The main concern was because it was nuclear, we already have a nuclear reactor in Brookhaven, this could've saved us millions. Now we are threatened with a big tank in our sound that already needs cleaning.

Long Island sound does not need a costly, risky, LNG barge. The tranquil Long Island Sound would be forever ruined by private armed security forces surrounding the barge. This facility limits public access and sets a dangerous precedent of industrialzing the Sound.

Please listen to us in helping us to not allow this to happen.
