OFFICE OF THE SECRETARY

Dear Sir or Madam;

Broadwater is too costly, risky, dangerous and not needed in Long Island Sound. Constant armed private security disrupts the peaceful tranquil waters of Long Island sound.

I've been in the fire service for forty six (46) years, twenty two in F.D.N.Y. what natural Gas can destroy when an accident occurs or any kind of mishandling of natural Gas is unbelievable and when compressed to a liquid the danger is thousands of times greater!!!

Sincerely

David L. Harvey
