Washington, DC 20426

Dear Ms. Salas:

I am most concerned about the notion of a liquefied natural gas facility in Long Island Sound or anywhere else becoming a reality. Not only am I disturbed at the thought of the potential for negative environmental impact that a facility as such may create but it would also limit general access to the entire area. Furthermore, I feel that the money needed for such an endeavor would be better spent in exploring alternatives to natural gas such as renewable energy.

Liquefied natural gas is far too volatile for us to entertain having in our habitat! Please tell me your thoughts on this matter. I look forward to hearing from you in writing as you have heard from me.

Sincerely,

Michelle Davidson, MPS., LAc.
