U.S. DEPARTMENT OF ENERGY

Dear Ms. Salas,

11/14/06

I was horrified to hear of the proposed Broadwater Liquid Natural Gas terminal to be built in the middle of the Long Island Sound. This project in my opinion will bring nothing but danger and disruption to our waterway. I am deeply worried about the potential cost to an already over taxed populace. Please consider the cost, risk and disruption this will create! Thank you, I would appreciate your attention and response to this very important issue.

Sincerely,

Elizabeth Tasopoulos
