To whom it may concern:

This letter is to inform you that we are very much against the Liquid Gas Terminal that is being planned to put in the Long Island Sound. Let's keep some natural and safe beauty upon the waters God put on the earth. We shouldn't have to worry of possible contamination or safety matters this project would bring, and can ill afford the increased taxes which will follow.

Please be considerate of the overtaxed people in Long Island, and reconsider this idea of placing such a facility here. Part of the allure of Long Island is its recreational waters with proximity to the City.

Thanking you for your consideration and thought to this Matter.

A concerned Long Island Home Owner,

Roseann and Gary Wiley
