FEDERAL ENERGY
REGULATORY COMMISSION

March 14, 2006

To Whom it May Concern;

I am writing to express my concern over the proposal to place a liquefied natural gas facility in the Long Island Sound. Not only would this facility limit public access to the Sound but it would endanger both the health and the safety of the Sound itself and those who live near it. Please do everything in your power to keep the Long Island Sound safe for generations to come.

Thanks in advance for all your help.

Sincerely,
Fiona Lagani

I am writing this letter to indicate that I am apposed to the proposed liquefied natural gas facility being considered to be built nine miles of Rocky Point. I believe the location of the facility would be enviornmentaly detromental to the recreational aspects of Long Island Sound and would negatively effect puplic access to the area. In addition I think it would create an easy target for terrorists.

I hope that you give this matter your most serious consideration, and would appreciate a written response.

Thankyou

John J. Buonsante

To Magalie R. Salas:

The liquefied natural gas facility should not be constructed in the Long Island Sound. It is a recovering natural resource and by constructing this facility it will only bring an unhealthy and dangerous situation for us all. The sound is a beautiful location and I would like it to remain as such so my children can enjoy it as well. Please reconsider your plans.

Sincerely,

A handwritten signature in black ink, appearing to read 'A. Miele', written in a cursive style.

To whom it may concern,

It is my own interest as a resident of the Long Island Sound area, to inform you of my opinion on Project Broadwater. I am a fisherman, who enjoys the environment in and around the sound. The LNG project proposed is an immediate danger to the preservation of the L.I.S. This facility would also limit the accessibility for fishermen/women, boaters, Sailors, etc. Thank you for your time.

I am opposed to the LNG
facility because of the environmental
of doing plants in so fragile and
po much dependent on our water and
our power. It also may cause
leakage and safety issues for our
citizens

Re: LNG Facility in Long Island Sound, New York

Dear Ms. Salas:

Please be advised that Long Island is not in need of a LNG plant. A LNG plant may endanger the health and safety of Long Island Sound and should not be built! We have enough toxins on Long Island.

Sincerely,

Kenneth H. Moncayo

Dear Ms. Salas,

The Long Island Sound has taken enough abuse from pollution, neglect, and over use due to our densely populated area. This letter is written to put on record that I, an Oyster Bay resident, believe the proposed LNG facility endangers the health and safety of the Long Island Sound and the residents of the area. Our area currently has one of the highest incidents of cancer in the country and many believe it is related to our contaminated water supply. I believe this facility should not be built.

I respectfully ask that you seriously consider not supporting this new facility.

Sincerely,

Kimberly Jennings

March 6, 2006

Dear Ms. Salas,

I am writing to you today to express my concern and to make it known that I oppose the construction and use of a Liquefied Natural Gas Facility on Long Island Sound.

As a resident of Oyster Bay, I have come to love and respect what living near the Long Island Sound has afforded to me. My fear is that the Liquefied Natural Gas Facility will endanger the health and safety of the Long Island Sound including the air quality and marine life.

I urge you to think of an alternative way to address the State's Energy needs.

I look forward to your position on this subject.

Sincerely,

Suzanne Paolucci

Washington, DC 20426

Dear Ms. Salas,

I am writing this letter to express my concern about plans for a LNG facility to be constructed in Long Island Sound. I feel that such a project would seriously impact marine life as well as air quality in the area. I also feel that there are inherent dangers which would conflict with the use of Long Island Sound as a recreational area.

I believe that our efforts as a country should be in exploring renewable resources of energy, not fossil fuels. Our resources and technology should be directed towards other power sources such as solar power.

Thank you for your attention to this matter.

Sincerely yours,

Dear Ms. Salas,

It has come to my attention through the wonderful efforts of the Citizens Campaign for the Environment, that a liquefied natural gas facility is being planned just nine miles off Rocky Point in the Long Island Sound.

I support the Citizens Campaign and ask that your commission reconsider this project "Broadwater", as such a facility will *endanger the health and safety of Long Island Sound and should not be built.*

Sincerely,

Handwritten signature of Jacqueline Corbitt Guglielmo in black ink.

To Whom It May Concern: 3/10/06

I wish it be known that I am against the building of the liquefied Natural gas facilities on or in the Long Island Sound.

A LNG facility ENDANGERS the health and safety of Long Island sound and should NOT be built.

This facilities limits public access and sets a dangerous precedent of industrializing the sound.

Please respond in writing to me informing me of your position on this matter.

Thank you for your cooperation.

Sincerely

Juan Farrell
