Office for General Counsel Ocean Services
National Oceanic & Atmospheric Administration
U.S. Department of Commerce
1305 East West Highway
Silver Spring, MD 20910

Dear General Counsel:

I am asking that you uphold Connecticut's Department of Environmental Protection's denial of Islander East.

Islander East has procedurally been denied permits from both CT DEP and the US Army Corps of Engineers and yet the Federal Government is considering overriding these denials. This undermines the citizens of Connecticut. President Bush and the Republican leadership has repeatedly stated that the Federal Government will not interfere with the State decision in regard to the desire of its citizens. Has there been a change in that position by our President?

Looking forward to your reply. Thank you.

Sincerely yours,

Thomas F. Morrissey, Jr.
24 Cliff Street
East Haven, CT 06512

PS I am posting this e-mail to you.

Islander East will be devastating for Long Island Sound and should be stopped. There is no reason for this pipeline to be built other than to line the pockets of Duke and KeySpan. I am typically a pro-business person but this proposal is too destructive.

Thank you for your consideration

Islander East Pipeline Company, LLC, should be denied permits to put a high pressure natural gas pipeline under Long Island Sound. Our Connecticut DEP denied Islander East, because substantial impacts to water quality, shellfish beds and tidal wetlands would result. Our bipartisan congressional delegation - Senators Dodd and Lieberman, all five House Representatives - asked Commerce to uphold our DEP.

It has been a long battle by dedicated and caring individuals and organizations to clean up the Sound; Islander East would set us back and profit only the corporation involved. Please do not let this pipeline go through; the results would be devastating for the people of Connecticut. Thank you for your attention to this mail.

Sincerely,

Joyce F. Kowalczyk
