Ladies and Gentlemen:

I wish to write you regarding the Broadwater proposal for the Long Island Sound, which would call for a liquefied natural gas terminal to be permanently docked in the middle of the Long Island Sound. I believe Broadwater is too costly and not needed in the Long Island Sound. Furthermore, I am deeply concerned regarding the potential for leaks and other natural disasters relating to docking a terminal so close to where we live. Additionally, the constant armed private security will disrupt the peaceful waters of the Long Island Sound that we enjoy throughout the year. The proposed facility will limit access and set a dangerous precedent of industrializing the Long Island Sound.

I would appreciate if you would let me know your position on this proposal. Please respond in writing to the address set forth below.

I appreciate your attention to this matter.

Sincerely,
[Handwritten signatures]
