

November 18, 2002

The Honorable Donald Evans
Secretary
United States Department of Commerce
14th & Constitution Ave. NW
Washington, DC 20230

Dear Secretary Evans:

I am writing to ask that you take prompt action to support the appeal by the Millennium pipeline that is awaiting action at the Department of Commerce.

In New York today, we bear the burden of some of the highest energy costs in the nation. Each day there are more concerns that we are headed toward shortages unless investments are made in new pipelines and power plants.

As a New York citizen, it disturbs me that a small group of affluent people who don't want the inconvenience of a utility near them are willing to jeopardize the energy security of tens of thousands of others in the state.

This project has been studied and debated for more than four years. The agency in charge of this process – the FERC – issued a decision that this project should be completed. All legitimate environmental concerns have been addressed.

For the benefit of all New York citizens, I urge your support for the Millennium appeal.

Sincerely,

David de Long
