

November 13, 2002

The Honorable Donald Evans, Secretary
United States Department of Commerce
1401 Constitution Avenue, NW
Washington, DC 20230

Dear Secretary Evans:

On behalf of Laborers' Local #1358, I am writing you to asking you to carefully review the appeal for the Millennium Pipeline project that is now pending. I support the Federal Energy Regulatory Commission that this is a needed energy project. Lets not forget the vast problems in California in the past couple of years.

Completion of this project means the addition of \$700 million in critical energy infrastructure for New York, jobs for thousands of workers and increased energy independence, which is a major concern considering the significance of a possible war in the Middle East which could increase the price of petroleum products to the value of gold.

It is important to note that the Department of Environmental Conservation and the Environmental Protection Agency (EPA) have both determined that the Millennium Pipeline can be completed in an environmentally acceptable manner.

Our union members who will be building the pipeline live and work in the communities along the pipeline route. They will make sure that the pipeline is built safely and that the local environment is protected.

We urge you to weigh the facts and take appropriate action to allow the Millennium Pipeline appeal to be successfully resolved.

Respectfully submitted:

William J. Cahn

OS EXECUTIVE SECRETARIAT
2002 NOV 20 AM 10:34

The Honorable Donald Evans, Secretary
United States Department of Commerce
1401 Constitution Avenue, NW
Washington, DC 20230

Dear Secretary Evans:

On behalf of LOCA 1358[#], I am writing you to carefully review the appeal of the Millennium pipeline project that is now pending before the Department of Commerce and support the Federal Energy Regulatory Commission's decision that this is an acceptable and needed energy project.

While representatives of our union will attend the November 13 hearing in Tarrytown, New York, in support of the Millennium appeal, I wanted our support to be noted in the written record as well.

The energy needs of our region are too critical to be diminished by becoming politicized, nor should they become secondary to a "not-in-my-backyard" pressure campaign.

It is important to note that in addition to the FERC, key agencies, including National Marine Fisheries, the Environmental Protection Agency and even New York's own Department of Environmental Conservation, have determined that Millennium's proposed crossing of the Hudson River can be completed in an environmentally-acceptable manner.

Our union members who will be building the pipeline live and work in communities along the proposed route. They will make sure that the pipeline is built safely and that the local environment is protected.

Completion of this project means the addition of \$700 million in critical energy infrastructure for New York, jobs for thousands of workers and increased energy independence.

We urge you to weigh the facts and take appropriate action to allow Millennium's appeal to be successfully resolved.

Joseph J. Blosser
