Ms. Salas

This evening a very responsible young man named John Sumner came to my house and informed my family of the Danger and Disruption to the Long Island Sound which will be caused by the Broadwater Project. The extent to which this project will affect all Long Islanders is immense and will last for generations to come. How could any politician representing Long Island, or New York State for that matter, EVER approve the substantial risks associated with placing a gigantic facility in the Sound??? You are clearly NOT representing the best interest of the citizens of Long Island if you vote to approve, or even ALLOW your fellow officials to consent to this project. Broadwater is too costly, risky and not needed in the Sound. This facility is an inappropriate use of the estuary. Our tranquil, calm waters of the Sound would be forever disrupted by the constant presence of armed private forces surrounding the barge. Would YOU want this in YOUR backyard??? Would you want your children enjoying the beaches and drinking the water that has been exposed to "Broadwater"??? I don't think so...

Please cast your vote to appose this project and find other sources of energy which will not disrupt our homes.

Thank You,

Elaine & Jeff Spencer
