Re: Broadwater LNG Terminal
Suffolk Co.
FERC, CORPS
05PR00342

Dear Mr. Shmookler:

This letter serves to inform you that the Section 106 review of the Broadwater LNG terminal and its associated pipeline has been concluded insofar as potential archaeological effects are concerned. It is the opinion of the State Historic Preservation Office that the construction of these facilities will have no effect on historic or cultural resources. Our file, however, remains open regarding the potential effects of support terminal construction in Long Island. We understand that the design of such facilities has not progressed to the point where effects can be evaluated. We trust that you will continue to consult with us on these components of the project as information becomes available. Thank you for your cooperation with us in the Section 106 consultation process.

Sincerely,

Mark L. Peckham
