CP06-54-000

Ms. Magalie Salas
Federal Energy Regulatory Commission
888 First Street, N.E. Room 1a
Washington, DC 20426

Dear Ms Salas:

With all the advances that Long Island has made cleaning up the Sound and making it environmentally stable, it mystifies me how local politicians and energy concerns are thinking about building a Liquefied Natural Gas facility and terminal in Long Island Sound. Although I feel energy for the future is a major concern here on Long Island, I also feel there must be some other way of meeting our needs. There are so many alternative energy sources that have not been looked at. Such a facility will only risk further damage to the environment as well as promote an increase in our reliance on fossil fuels.

Please consider voting against such a project.

Sincerely,

Kevin Franznick
