Dear Magalie R. Salas,

UNITED STATES
FEDERAL ENERGY
COMMISSION

CP06-54-000

I am very concerned about the Broadwater proposal of placing a Liquefied Natural Gas terminal in Long Island Sound. Many environmental groups find this to be a risky situation and so I am opposed to it.

Another concern of mine is that the area to be utilized is quite large and will impede fishing and other recreational use. Moreover, the armed security required would disrupt the peacefulness of the sound.

Thirdly, I don't feel that industrializing the sound will stop with one company, so the future of the sound would be in jeopardy.

I sincerely hope you will do your best to terminate this proposal.

Sincerely,

Diane Streuli
