FEDERAL ENERGY
REGULATORY COMMISSION

March 10, 2006

Ms. Magalie Salas
Federal Energy Regulatory Commission
888 First St., N.E., Room 1a
Washington, DC 20426

Dear Ms. Salas,

It has come to my attention that a proposed Liquefied Natural Gas Facility has been proposed to be built in the Long Island Sound. This facility does not belong in the Long Island Sound. A Liquefied Natural Gas Facility endangers the health and safety of the Long Island Sound and it should not be built. This facility, if built would limit public access to the sound and as a resident of Long Island and a boater I strongly suggest that it should not be built.

Thank you for your immediate attention to this matter.

Sincerely,

Mrs. Patricia Fuchs

Washington, DC 20426

Magalie Salas,

My husband and I are writing a letter in the hopes that you make the best choice for our environment. This would involve not allowing for a liquefied natural gas facility in our Long Island Sound. As a science teacher I believe money would be better invested in alternative, renewable resources like solar energy. Natural gas is a resource that may not be depleted before the end of my lifetime, but might be during the lifetime of our children. Why should we jeopardize the ecosystem, while we are looking at a 'short term' gain for this energy industry?

I am of a third generation raised in Mamaroneck, and my husband and I are fortunate to be able to raise our children here. It is our hope that they will appreciate the beauty of the sound. This will only occur if we act to reduce pollution and promote, not just sustain, the levels of aquatic life in the sound.

As I have unfortunately witnessed during my 38 years, runoff pollution has closed many beaches in my community. What used to be public beaches with little space to spread a blanket, are now beginning to see increasing numbers of visitor throughout the summer (nothing like it was during the '70's). Harbor Island Beach is now 'safe' to beach-goers, after years of studies and current procedures involving gunderbooms and citing those that are the sources of pollution. Local government officials are becoming more active in reversing the process of what many years of neglect and ignorance have caused.

Again, we hope that you will not allow for a liquefied natural gas facility in our neighboring Long Island Sound. Our community is not one to turn a blind eye to protecting our environment, education enables us the foresight to prevent damage to our surroundings - of which we are merely caretakers. Hopefully, our educated officials will not allow for industry and economics prevail over the health of our environment which will affect us all.

Respectfully,

Susan Evangelista Moore
Julian A.S. Moore

To whom this may concern,

I was recently told about the Liquefied Natural Gas Facility to be built in the Long Island Sound. Reading over what will come if this is built I feel this is not a positive move for the area. The sound has preexisting problems that do not need to be added too.

The LNG facility endangers the health and safety of Long Island Sound and should not be built.

Please let me know your position on the facility.

Thank you,

Bridget Goetze

Magalie R. Salas

I have recently learned of the proposed natural gas facility in the long island sound. I am concerned that the industrialization of the sound will put more pressure on the already struggling ecosystem. My family and I sail and fish in the summer months and the sound is an important part of our community here in Mamaroneck NY. I believe if the environmental and safety issues of this project are carefully evaluated they will far out weigh any potential financial gain. It should not be built.

Sincerely,
Jenzpher Finkenberg

Attention: Magalie R. Salas

Dear Sirs:

I am writing in opposition to the building of a liquefied natural gas facility in Long Island Sound. This industrial venture would negatively affect fishing, swimming, sailing and the natural beauty of the Sound.

I would prefer the government support non-fossil fuel research rather than diminish this waterway which is enjoyed recreationally by all the states surrounding it. Our country's waters are polluted enough.

Yours truly,

Joan McTyre

Re: Broadwater – liquefied natural gas facility

Dear Ms. Salas:

I write to express my concern regarding the proposed placement of a liquefied natural gas facility in the Long Island Sound. As you know, a liquefied natural gas facility endangers the health and safety of Long Island Sound and should not be built. Given the public's use of the Sound for both recreational and commercial activities, it is an inappropriate location for a liquefied natural gas facility. Furthermore, placing the proposed facility in the sound will limit public access and will set a dangerous precedent that will pave the way for the industrialization of the Sound.

As a public official it is your duty to address the concerns of the citizenry you serve.

Should you have any questions, please contact me at the above address.

Very truly yours,

Lorraine Girolamo

March 17, 2006

2006 MAR 27 P 12:44
Dear Magalite R. Salas, Honorable George Pataki,
and Captain Peter Boynton,

It has come to my attention that a proposal has been made to build a liquefied natural gas facility in the middle of Long Island Sound. This upsets me in many ways. The two top reasons would be endangering the health and safety of Long Island Sound and destroying what little we have left of our beautiful Country.

This liquefied Natural Gas Facility endangers the health and safety of the Long Island Sound. Here are just a few that have come to my mind. The air we breathe, the wildlife, the water, the marine life in the water, all the people who use the water to make money for food to feed their families. What if the 1 mile radius isn't enough to protect the people who swim, and fish, and sail? What if chemicals and such seep out? Just of all the scary thoughts of what could happen would keep me away from the Long Island Sound and anything that comes from it. If I am afraid I could be harmed in some way I can not imagine what thoughts are going through those that live closer.

Over the years our air, land, and water have been abused and destroyed. Slowly our world is being stripped of all its beauty. We should not be proud of this nor should we ignore it. Everyone is money hungry, forgetting what life is about. How can one enjoy a life with an ugly environment and unhealthy people?

I know of no other way to help but to write this letter. I fear for not only me, but my child's generation, and her child's generation. I ask that you give some great thought to this proposal and stop this Liquefied Natural Gas facility from being built.

Sincerely
Jessica R. Lombard

Dear Ms Salas,

I am writing to you to register my opposition to the proposed liquefied natural gas facility for Long Island. The proposed "Broadwater" project is an extraordinarily bad idea.

My main concern is that "Broadwater" will endanger the health and safety of Long Island Sound. Marine life will be threatened particularly in the months from May to November. The effects of Constructing the pipeline will also be deleterious to the area. The mere act of digging will cause sediment and organic materials to muddy the water and subsequently decrease the oxygen level in the waters in that 25 mile area. Shellfish and other bottom dwellers will suffer greatly. Air quality will also be affected negatively due to the increase of carbon dioxide emissions. I don't want my kids breathing those increased emissions!

I would like to know where you stand on this issue.

Sincerely,

To whom it may concern,

I must voice my concerns with the Broadwater Project. As a resident of Harrison, a mere ten minute walk from the Long Island Sound, I do not feel comfortable with the thought of it becoming such an industrial area; especially for a non-renewable energy source. The impacts of the Broadwater Project will be felt by all of those who attend the Long Island Sound.

I am sure that it is not necessary for me to discuss the ramifications of the Broadwater Project against the environment. The very construction of such a large facility will undoubtedly affect the indigenous marine life; around half of which is a protected species in the New York area. There are many other problems that can arise as a result of building a 25-mile long pipeline in the Sound, and also from shipping large tankers full of explosive materials to the facility.

There are plenty of other issues that must be discussed, however, I am sure that you know of them already and do not need to be reminded of them. It may help to admonish the fact that a liquefied natural gas facility does not belong in the Long Island Sound, where countless numbers of New York and Connecticut citizens spend their recreation time. If anything should be done to it, it should be environmentally minded and not something that has the potential to impact the area in a negative way.

Thank you very much for your time and consideration,

Dear Ms. Magalie R. Salas,

~~Handwritten signature/initials~~

I am writing to let you know how upset I am about a possible industrialization of the Long Island sound.

I grew up in Larchmont and now live in Mamaroneck—right on the Long Island sound. This is a place people come to relax and enjoy themselves. I don't want to worry about a ridiculous "PUBLIC NO ACCESS ZONE" when I am on a boat with friends. One of the reasons I never left this wonderful community is because of the sound. I can see it when I look out my window.....and one day I would like my children to do the same thing without worrying about liquefied natural gas.

The bottom line is —the LNG facility endangers the health and safety of the Long Island Sound and it should NOT be built. Why on earth would we want to start a precedent of industrializing the sound?????????

The people that live in this community pay top dollar for their homes and pay a hefty sum in taxes. We should have a say. And I say NO to a liquefied natural gas facility taking residence in our waters. I say NO to LNG!!!!!!!!!!!! I know all my neighbors feel the same way.

I do hope you take us seriously. It is for the good of the community and marine life who call this wonderful area we live in home.

Sincerely,

Patricia L. Ball

Re: LNG Facility on Long Island Sound

Dear Ms. Salas:

I am opposed to the construction of a Liquid Natural Gas Facility on the Long Island Sound. Such a facility would endanger both the fish and wildlife inhabiting this area and the people living around the sound. The risk that this facility may become a terrorist target is very real and we, as tax paying citizens, have a right to feel safe and secure in and around our homes. We should be able to send our children off to school without feeling that they may be in danger at any moment.

The Long Island Sound must not be industrialized. This is where we sail and swim. If public access were to be restricted, we would be adversely affected. This would set a dangerous precedent.

I am requesting from you, in writing, a response to my concerns.

Thank you,

FEDERAL ENERGY
REGULATORY COMMISSION

Dear Sir:

I have just learned about the plans of the LNG facility for the Long Island Sound. I want to express my deep concern that the LNG facility endangers the health and and safety of the Long Island Sound and should not be built. This facility limits public access and sets a dangerous precedent of industrializing the sound.

I would like to know your stand on this proposal. Please let me know in writing your position.

Thank you for your prompt attention to this matter.

A concerned Long Island Sounder,

Joanne Chrzescijanek
