RECEIVED
FEDERAL ENERGY REGULATORY COMMISSION

Dear Ms. Salas,

I am writing to add my voice to that of my many neighbors on Long Island Sound in protest of the proposed Broadwater Liquefied Natural Gas terminal. Long Island Sound is a public resource and as such should be protected as one would protect any such resource.

As a resident of New Rochelle, my family enjoys all of the benefits of having Long Island Sound in our back yard. In addition, having grown up in this area, I know full well how important this is and enjoy being able to share it with my children as my parents shared it with me.

Broadwater would hurt the local fishing community as well as the local boating community, both of which add revenue to this area. The added tanker traffic must have aesthetic and environmental issues attached to it both short term and long term. In addition, the views alone are one of the most beautiful in the state and should not be tampered with.

Although this facility may have seemed a good idea at one time, all aspects of it need to be viewed. I for one see more cons in this situation and respectfully request that this facility not be built.

Thank you for your time and attention. I know that our voices will be heard.

Sincerely,

Amanda I. Torres-Stadnik
