Dear Magalie R. Salas

I have recently been informed of a project which would place a Liquefied Natural Gas Terminal in the Long Island Sound. I strongly disagree with this idea, and believe that it should not be approved. It is unsafe, and too costly. It is also a perpetuation of oil based fuel, which is definitely a step backwards. The Long Island sound is not a privatized space for companies. Please inform me on your position on this issue, it is important to me.

Sincerely  
  
Patrick Groneman
