Dear Sir:

I am writing to express my opposition to the development of a liquefied natural gas (LNG) facility in Long Island Sound. I am a life long resident of New Rochelle on the western end of the Sound and have witnessed the deterioration of the fishery and general water quality over the past fifty years. It is time to stop adding to the problem. A LNG facility in the middle of the sound endangers the health and safety of Long Island Sound and should not be allowed. Such a facility will also limit public access to large areas of the sound and set a dangerous precedent for the industrialization of the sound. I urge you to do everything in your power to prevent this facility from being built.

I look forward to your written response concerning your position on this issue.

Sincerely,

Tandy W. Guinn, Jr.
