OS EXECUTIVE SECRETARIAI

2003 JAN -8 AM 11: 18

Secretary Donald L. Evans  
Office of the Secretary  
Room 5854  
U.S. Department of Commerce  
14<sup>th</sup> & Constitution Ave. NW  
Washington, DC 20230

Dear Secretary Evans,

I am writing as a member and/or volunteer of Teatown Lake Reservation, a 759-acre nature preserve and education center located in the Croton Watershed and in the path of the proposed Millennium Pipeline, to express my belief that you should not overturn a correct and properly made decision by New York State regarding the Millennium Gas Pipeline crossing of the Hudson River as proposed.

On May 9, 2002, the New York Department of State issued its determination:

*The Department of State's decision found that the proposal was inconsistent with the provisions of the federal Coastal Zone Management Act and violated its policies in several ways by:*

- *Adversely affecting the State-designated Haverstraw Bay Significant Coastal Fish and Wildlife Habitat.*
- *Not adequately addressing concerns regarding the drinking water supply for New York City and some Westchester Communities.*
- *Being inconsistent with the Village of Croton-on-Hudson's Local Waterfront Revitalization Program.*

Teatown's preserve would be severely impacted by this pipeline route, as would the watershed in which it plays a major role. Teatown's wetlands, lake and streams are currently providing vital protection to the Croton Reservoir by filtering pollution through wetland plants and preventing flooding through the many systems available in the natural environment. Construction of the Millennium Pipeline through Teatown would destroy these natural systems so important for the protection of public drinking water, not to mention the impact it would have on Teatown's operation as a regional environmental education center serving over 40,000 citizens each year.

I respectfully request a commitment for an early decision on this matter and a decision that upholds New York's right to protect its coastline, environment, and citizens.

Sincerely,

Signature

OS EXECUTIVE SECRETARIAT

2003 JAN -8 AM 11:19

December 24, 2002

Dear Secretary Evans,

I am writing in support of the New York Department of State decision regarding the Millennium Pipeline project which ruled the project inconsistent with the Coastal Zone Management Act. This ruling properly recognizes the devastating impacts of the project to the Hudson River, the New York City Watershed, and so much more.

I believe that the Bowline Solution is the right solution for the Millennium Pipeline. Terminating the Millennium Pipeline at the Bowline Facility allows New York to protect the Coastal Zone and enables Columbia Gas to fix the decrepit A-5 line that makes up 222 miles or 52.9% of the pipeline's 420 mile route. This allows Millennium to fulfill its purpose as described to the Federal Energy Regulatory Commission of delivering natural gas to "delivery points in New York State". The Bowline Solution is a viable alternative that allows Millennium to pursue its goals without destroying our environment and endangering our communities.

Do not impinge on State's rights by overriding this well thought out decision.

Sincerely,

  
Albert Cheong

Dear Mr. Evans:

I am writing to strongly suggest that before approving the Millennium gas pipeline as proposed by the Columbia Gas Transmission company you consider the vast negative side effects of running the line through such a densely populated area adjacent to the Hudson River, a national environmental treasure, that would be subjected to blasting and dredging to accommodate the pipeline.

Please put off any decision until you have heard and considered alternative proposals from several of the other gas companies interested in supplying gas to New York City. In depth studies still need to be made to justify the installation of a gas line through this densely populated area, with special consideration to alternate routes, such as one proposed by the Federal Energy Regulatory Commission.

Sincerely yours,

December 30, 2002

Dear Secretary Evans,

I am writing in support of the New York Department of State decision regarding the Millennium Pipeline project which ruled the project inconsistent with the Coastal Zone Management Act. This ruling properly recognizes the devastating impacts of the project to the Hudson River, the New York City Watershed, and so much more.

I believe that the Bowline Solution is the right solution for the Millennium Pipeline. Terminating the Millennium Pipeline at the Bowline Facility allows New York to protect the Coastal Zone and enables Columbia Gas to fix the decrepit A-5 line that makes up 222 miles or 52.9% of the pipeline's 420 mile route. This allows Millennium to fulfill its purpose as described to the Federal Energy Regulatory Commission of delivering natural gas to "delivery points in New York State". The Bowline Solution is a viable alternative that allows Millennium to pursue its goals without destroying our environment and endangering our communities.

Do not impinge on State's rights by overriding this well thought out decision.

Sincerely,

Genevieve Hutton

December 31, 2002

Dear Secretary Evans,

I am writing in support of the New York Department of State decision regarding the Millennium Pipeline project which ruled the project inconsistent with the Coastal Zone Management Act. This ruling properly recognizes the devastating impacts of the project to the Hudson River, the New York City Watershed, and so much more.

I believe that the Bowline Solution is the right solution for the Millennium Pipeline. Terminating the Millennium Pipeline at the Bowline Facility allows New York to protect the Coastal Zone and enables Columbia Gas to fix the decrepit A-5 line that makes up 222 miles or 52.9% of the pipeline's 420 mile route. This allows Millennium to fulfill its purpose as described to the Federal Energy Regulatory Commission of delivering natural gas to "delivery points in New York State". The Bowline Solution is a viable alternative that allows Millennium to pursue its goals without destroying our environment and endangering our communities.

Do not impinge on State's rights by overriding this well thought out decision.

Sincerely,

**Dear Secretary Evans:**

**I support the decision of the New York Department of State, which ruled the Millenium Pipeline in violation of the Coastal Zone Management Act.**

**The Millenium Pipeline should terminate at the Bowline Facility. Doing so would permit the project to deliver natural gas at various points in New York without posing the substantial risks to both environment and people inherent in Millenium's current proposal.**

**Sincerely,**

**Stephen J. Meyers**
