

EXECUTIVE SUMMARY .....	
ES 1. BACKGROUND, STUDY FRAMEWORK, AND ASSUMPTIONS .....	
ES 2. PRINCIPAL FINDINGS AND ANALYTICAL RESULTS .....	5
ES 3. GAS AND ELECTRIC SYSTEM RISKS AND UNCERTAINTIES .....	7
INTRODUCTION .....	9
<b>1. CONCEPTUAL FRAMEWORK FOR ASSESSING PIPELINE ADEQUACY .....</b>	<b>11</b>
1.1 Determinants of Generator Gas Demands .....	11
1.2 Determinants of Gas Supply and Transmission Capacity for Generation .....	17
1.3 Framework for Analysis .....	21
<b>2. INTEGRATED ELECTRIC/GAS MODELING METHODOLOGY .....</b>	<b>25</b>
2.1 Analytical Framework and Assumptions .....	25
2.2 Overview of Integrated Model Structure .....	28
<b>3. DESCRIPTION OF ELECTRIC AND GAS SYSTEM ANALYSES .....</b>	<b>31</b>
3.1 Definition of Scenarios .....	31
3.2 Institutional and Regulatory Background .....	32
3.3 Basic Drivers of the Integrated Electric/Gas System Analysis .....	33
<b>4. CHARACTERIZATION OF GAS DEMANDS OF ELECTRIC GENERATORS .....</b>	<b>35</b>
4.1 Electric Generation Capacity Expansion Scenarios .....	35
4.2 Fuel Demands for Electricity Generation .....	38
4.3 Intraday Variation in Gas Demands for Electricity Generation .....	42
<b>5. GAS DEMAND AND SUPPLY .....</b>	<b>49</b>
5.1 Pipeline Capacity Additions .....	49
5.2 Gas Demands for Traditional End Users .....	50
5.3 Gas Demands For Electricity Generation .....	53
5.4 Analytical Results: Gas and Oil Use for Electricity Generation .....	55
5.5 Projected and Historical Oil Usage .....	68
5.6 Extreme Weather Sensitivity Cases .....	69
5.7 Electricity Generation Fuel Mix and Reliability Considerations .....	71
<b>APPENDIX A: NEW YORK GAS AND ELECTRIC SYSTEM INFRASTRUCTURE .....</b>	<b>71</b>
<b>APPENDIX B: OVERVIEW OF GAS DISPATCH MODEL .....</b>	<b>77</b>
<b>APPENDIX C: OVERVIEW OF ELECTRIC DISPATCH MODEL .....</b>	<b>83</b>
<b>APPENDIX D: GAS-FIRED GENERATION IN THE NEW YORK CONTROL AREA, BY LDC .....</b>	<b>85</b>
