The Honorable Don Evans
Secretary
U.S. Department of Commerce
14th & Constitution Ave. NW
Washington, DC 20230

May 20, 2002

Dear Secretary Evans:

As you know, the New York Department of State announced on May 9th, that the proposed route for the Millennium Pipeline is inconsistent with the policies of the New York State Coastal Management Program. I understand that the Columbia Gas Transmission Corp. has appealed the Department of State's decision to you. I am writing in support of the decision and to request that you uphold the Department of State's determination to block the dredging of the Hudson River at Haverstraw Bay.

I firmly believe that the New York Department of State's decision was based on sound environmental policy and good science. I am concerned with the environmental impact that the pipeline crossing would have on the local environment, community development, and the regions drinking water. First and foremost, I am concerned that dredging the 2.1 miles of the Hudson River would disrupt fish and other wildlife in the bay. As a fish estuary, Haverstraw Bay is one of the most biologically diverse sections of the river and should be preserved and protected, not disrupted for the laying of a pipeline. Secondly, the revitalization of local waterfronts would be impaired, harming local economic development efforts in Haverstraw and Croton-on-Hudson. Finally, New York City and Westchester's drinking water could be detrimentally impacted, and any need for natural gas should not come at the expense of our critical water resources. The proposed pipeline route would run 2 feet from a 90 year old aqueduct supplying 40% of the drinking water to NYC, cut down 10% of the trees in the NYC watershed that is needed to filter the water that 9 million people drink, and additionally, runs perilously close to the ConEd electric supply jeopardizing 40% of NYC's electricity and 1900 Briarcliff Manor school children.

While some of the above is not germane to your decision process, these impacts underscore the need for your support of the New York Department of State's decision.

thank you for your attention to my request.

Sincerely,

Secondly, the revitalization of local waterfronts would be impaired, harming local economic development efforts in Haverstraw and Croton-on-Hudson. Finally, New York City and Westchester's drinking water could be detrimentally impacted, and any need for natural gas should not come at the expense of our critical water resources. The proposed pipeline route would run 2 feet from a 90 year old aqueduct supplying 40% of the drinking water to NYC, cut down 10% of the trees in the NYC watershed that is needed to filter the water that 9 million people drink, and additionally, runs perilously close to the ConEd electric supply jeopardizing 40% of NYC's electricity and 1900 Briarcliff Manor school children.

While some of the above is not germane to your decision process, these impacts underscore the need for your support of the New York Department of State's decision.

I thank you for your attention to my request.

Sincerely,

Washington, DC 20230

May 20, 2002

Dear Secretary Evans:

As you know, the New York Department of State announced on May 9th, that the proposed route for the Millennium Pipeline is inconsistent with the policies of the New York State Coastal Management Program. I understand that the Columbia Gas Transmission Corp. has appealed the Department of State's decision to you. I am writing in support of the decision and to request that you uphold the Department of State's determination to block the dredging of the Hudson River at Haverstraw Bay.

I firmly believe that the New York Department of State's decision was based on sound environmental policy and good science. I am concerned with the environmental impact that the pipeline crossing would have on the local environment, community development, and the regions drinking water. First and foremost, I am concerned that dredging the 2.1 miles of the Hudson River would disrupt fish and other wildlife in the bay. As a fish estuary, Haverstraw Bay is one of the most biologically diverse sections of the river and should be preserved and protected, not disrupted for the laying of a pipeline. Secondly, the revitalization of local waterfronts would be impaired, harming local economic development efforts in Haverstraw and Croton-on-Hudson. Finally, New York City and Westchester's drinking water could be detrimentally impacted, and any need for natural gas should not come at the expense of our critical water resources. The proposed pipeline route would run 2 feet from a 90 year old aqueduct supplying 40% of the drinking water to NYC, cut down 10% of the trees in the NYC watershed that is needed to filter the water that 9 million people drink, and additionally, runs perilously close to the ConEd electric supply jeopardizing 40% of NYC's electricity and 1900 Briarcliff Manor school children.

While some of the above is not germane to your decision process, these impacts underscore the need for your support of the New York Department of State's decision.

I thank you for your attention to my request.

I am writing in support of the decision and to request that you uphold the Department of State's determination to block the dredging of the Hudson River at Haverstraw Bay.

I firmly believe that the New York Department of State's decision was based on sound environmental policy and good science. I am concerned with the environmental impact that the pipeline crossing would have on the local environment, community development, and the regions drinking water. First and foremost, I am concerned that dredging the 2.1 miles of the Hudson River would disrupt fish and other wildlife in the bay. As a fish estuary, Haverstraw Bay is one of the most biologically diverse sections of the river and should be preserved and protected, not disrupted for the laying of a pipeline. Secondly, the revitalization of local waterfronts would be impaired, harming local economic development efforts in Haverstraw and Croton-on-Hudson. Finally, New York City and Westchester's drinking water could be detrimentally impacted, and any need for natural gas should not come at the expense of our critical water resources. The proposed pipeline route would run 2 feet from a 90 year old aqueduct supplying 40% of the drinking water to NYC, cut down 10% of the trees in the NYC watershed that is needed to filter the water that 9 million people drink, and additionally, runs perilously close to the ConEd electric supply jeopardizing 40% of NYC's electricity and 1900 Briarcliff Manor school children.

While some of the above is not germane to your decision process, these impacts underscore the need for your support of the New York Department of State's decision.

I thank you for your attention to my request.

Sincerely,

I understand that the Columbia Gas Transmission Corp. has appealed the Department of State's decision to you. I am writing in support of the decision and to request that you uphold the Department of State's determination to block the dredging of the Hudson River at Haverstraw Bay.

I firmly believe that the New York Department of State's decision was based on sound environmental policy and good science. I am concerned with the environmental impact that the pipeline crossing would have on the local environment, community development, and the regions drinking water. First and foremost, I am concerned that dredging the 2.1 miles of the Hudson River would disrupt fish and other wildlife in the bay. As a fish estuary, Haverstraw Bay is one of the most biologically diverse sections of the river and should be preserved and protected, not disrupted for the laying of a pipeline. Secondly, the revitalization of local waterfronts would be impaired, harming local economic development efforts in Haverstraw and Croton-on-Hudson. Finally, New York City and Westchester's drinking water could be detrimentally impacted, and any need for natural gas should not come at the expense of our critical water resources. The proposed pipeline route would run 2 feet from a 90 year old aqueduct supplying 40% of the drinking water to NYC, cut down 10% of the trees in the NYC watershed that is needed to filter the water that 9 million people drink, and additionally, runs perilously close to the ConEd electric supply jeopardizing 40% of NYC's electricity and 1900 Briarcliff Manor school children.

While some of the above is not germane to your decision process, these impacts underscore the need for your support of the New York Department of State's decision.

I thank you for your attention to my request.

Sincerely,

Dear Secretary Evans:

As you know, the New York Department of State announced on May 9th, that the proposed route for the Millennium Pipeline is inconsistent with the policies of the New York State Coastal Management Program. I understand that the Columbia Gas Transmission Corp. has appealed the Department of State's decision to you. I am writing in support of the decision and to request that you uphold the Department of State's determination to block the dredging of the Hudson River at Haverstraw Bay.
